

Eduardo Wiese

IT/Software Engineer - Wealth Management Specialist

Software developer with 7+ years of experience in .NET Technologies, specializing in financial systems integration, risk management solutions, and wealth management platforms with strong Unix/Linux and database expertise.

WORK EXPERIENCE

Software Developer

Connectcom SRL - Leudelange, Luxembourg | April 2024 - September 2024

- Developed internal financial applications using .NET MAUI and Blazor WebAssembly, focusing on system integration and data processing functionality
- Configured and maintained Linux-based RETINA network infrastructure with custom monitoring tools, resolving 50+ critical system issues monthly using bash scripting and Unix commands
- Implemented automated testing procedures and documentation standards for production deployments

Consultant / Full-Stack Developer

Elliott Group - Gasperich, Luxembourg | October 2023 - March 2024

- **Led development workflows for FinTech and Wealth Management systems** using .NET Core 8, implementing robust financial data processing solutions
- Designed and implemented CI/CD pipelines on Azure DevOps with automated testing and deployment procedures for financial applications
- **Collaborated with cross-functional teams** including business analysts and QA teams to optimize MS-SQL databases for financial reporting, resulting in successful deployment of 15+ critical updates

Software Engineer

BSolutions Group - Milan, Italy | February 2021 - October 2023

- **Developed financial applications for marine reinsurance sector**, working with complex business models for yacht, ship, and cruise vessel insurance policies using .NET Core 6 and Angular 16
- **Designed comprehensive data models for reinsurance operations** using MS-SQL, stored procedures, and triggers with Entity Framework, enabling seamless integration across 10+ financial teams
- **Implemented risk assessment modules** and automated reporting systems that streamlined underwriting processes and improved portfolio management efficiency

Software Engineer

Autoware SRL - Padova, Italy | June 2018 - February 2021

- Developed comprehensive SSRS reports for financial data visualization and KPI tracking, providing management with actionable insights for data-driven investment decisions
- Built automated monitoring systems using .NET 4.6 with SQL stored procedures and triggers for real-time data processing and operational efficiency analysis
- Created financial dashboards and reporting tools that improved operational transparency and regulatory compliance

Analyst, Solution Developer - Risk Management Specialist

Avanade - Milan, Italy | October 2016 - June 2018

- **Led Risk Management system integration projects**, maintaining critical B2B insurance and wealth management portals with focus on regulatory compliance and data integrity
 - **Specialized in COBOL to .NET migrations** for financial systems, implementing SQL data correction procedures that reduced system downtime by 90% (from 50 to 5 incidents monthly)
 - **Executed complex database migrations** from DB2/COBOL legacy systems to modern MS-SQL/.NET architecture, ensuring zero downtime during 6-month financial system transitions using Agile/Scrum methodology
 - **Developed shell scripts and automation tools** for data validation and system monitoring in Unix/Linux environments

TECHNICAL SKILLS

Financial Systems & Wealth Management

- Risk Management Systems Integration
- Reinsurance and Insurance Platform Development
- Financial Data Processing and Reporting

- Regulatory Compliance Implementation

Unix/Linux & Shell Scripting

- **Bash Scripting** (Advanced - 7+ years experience)
- **Ksh Scripting**
- Linux System Administration
- Unix Command Line Tools and Automation

Database Technologies

- **Oracle SQL and PL/SQL** (Advanced)
- **Microsoft SQL Server** (Expert level)
- PostgreSQL, DB2, MongoDB
- Database Migration and Integration
- Stored Procedures and Triggers

Programming Languages & Integration

- **COBOL Integration** (Legacy system modernization)
- C#, .NET Framework/.NET Core
- Python (NumPy, Pandas for financial analysis)
- JavaScript/TypeScript, Angular, Vue.js

Development Frameworks

- .NET Framework/.NET Core
- Entity Framework (EF)
- Blazor Server/WebAssembly
- .NET MAUI

Testing & DevOps

- **Test Automation** (Selenium, Unit Testing)
- **GitLab/GIT** Version Control
- Azure DevOps, Docker, Kubernetes
- CI/CD Pipeline Implementation

Methodologies

- **Agile/Scrum** (5+ years experience)
- Test-Driven Development

- Financial System Integration Best Practices
-

CERTIFICATIONS

- **AZ-900** - Microsoft Azure Fundamentals
 - **AZ-204** - Microsoft Azure Developer Associate
 - **CCNA** - Cisco Certified Network Associate
-

EDUCATION

Università degli Studi di Brescia

- MSc. in Communication Technologies and Multimedia

Pontificia Universidad Catolica del Peru

- BS. in Telecommunications
-

KEY HIGHLIGHTS FOR WEALTH MANAGEMENT

- ✓ **7+ years** of financial systems development and integration experience
- ✓ **Proven expertise** in Risk Management and Insurance/Reinsurance platforms
- ✓ **Advanced Unix/Linux** and shell scripting capabilities
- ✓ **Database specialist** with Oracle SQL/PL/SQL and complex financial data modeling
- ✓ **COBOL integration experience** for legacy financial system modernization
- ✓ **Cross-functional collaboration** with business teams and regulatory compliance focus
- ✓ **Agile methodology** expertise with successful financial project deliveries
